

The Fountain at Sucy-en-Brie is Well Maintained

9 Rue du Temple
 Sucy-en-Brie 94370
 FRANCE

The Wallace Fountain in Sucy-en-Brie is located in the heart of the old village. Foundry markings at the base of this fountain indicate it was manufactured in 1989. When it was first installed is unknown.

The old village district underwent a partial rehabilitation in 2018, with the aim of upgrading the infrastructure of the city center. The existing Wallace Fountain also benefited from the renewal of the heart of the city. The fountain was restored, repainting and connected to the drinking water circuit in 2019. Street furniture that harmonized with the fountain was placed nearby, allowing passers-by to enjoy a rest in the presence of the fountain.

If anyone has additional information about the history or origin of this fountain, please share it by contacting us at admin@wallacefountains.org.
